

A gold producer in the Americas,
expanding for tomorrow

May 2024

This presentation contains “forward-looking information” or “forward-looking statements” within the meaning of Canadian securities legislation. All statements included herein, other than statements of historical fact, including without limitation statements relating to: estimated production and cost guidance in 2024, targeted production and cost guidance in 2026, the 2024 exploration program and the details and objectives thereof, the unique opportunity to unlock value through contract mining partners, the plant expansion at Segovia and the details and timing thereof, the Marmato Lower Mine expansion and the details and timing thereof, the potential of and plans pertaining to the Company’s growth projects, the repositioning of Aris Mining within gold producer peer group, the Company’s ESG objectives, and the Company’s goals and objectives. Generally, the forward-looking information and forward-looking statements can be identified by the use of forward-looking terminology such as “become”, “believe”, “estimate”, “expect”, “forward”, “intend”, “plan”, “potential” or variations of such words and phrases or state that certain actions, events or results “may”, “could”, “would”, “might” or “will” be taken, “occur” or “be achieved”. Statements concerning mineral reserve estimates and mineral resource estimates may also be deemed to constitute forward looking information to the extent that they involve estimates of the mineralization that will be encountered. The material factors or assumptions used to develop forward looking information or statements are disclosed throughout this presentation.

Forward looking information and forward looking statements, while based on management’s best estimates and assumptions, are subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of Aris Mining to be materially different from those expressed or implied by such forward-looking information or forward looking statements, including but not limited to: local environmental and regulatory requirements and delays in obtaining required environmental and other licenses, changes in national and local government legislation, taxation, controls, regulations and political or economic developments, uncertainties and hazards associated with gold exploration, development and mining, risks associated with tailings management, risks associated with operating in foreign jurisdictions, risks associated with capital cost estimates, dependence of operations on infrastructure, costs associated with the decommissioning of the Company’s properties, fluctuations in foreign exchange or interest rates and stock market volatility, operational and technical problems, the ability to maintain good relations with employees and labour unions, competition; reliance on key personnel, litigation risks, uncertainties relating to title to property and mineral resource and mineral reserve estimates, risks associated with acquisitions and integration, risks associated with the Company’s ability to meet its financial obligations as they fall due, volatility in the price of gold, or certain other commodities, risks that actual production may be less than estimated, risks associated with servicing indebtedness, additional funding requirements, risks associated with general economic factors, risks associated with secured debt, changes in the accessibility and availability of insurance for mining operations and property, environmental, sustainability and governance practices and performance, risks associated with climate change, risks associated with the reliance on experts outside of Canada, pandemics, epidemics and public health crises, potential conflicts of interest, uncertainties relating to the enforcement of civil liabilities outside of Canada, cyber-security risks, risks associated with operating a joint venture, volatility of the share price, the ability to pay dividends in the future, as well as those factors discussed in the section entitled “Risk Factors” in Aris Mining’s most recent AIF and Management’s Discussion and Analysis available on SEDAR+ at www.sedarplus.ca and in the Company’s filings with the U.S. Securities and Exchange Commission (“SEC”) at www.sec.gov.

Although Aris Mining has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information and forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such information or statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information or statements. The Company has and continues to disclose in its Management’s Discussion and Analysis and other publicly filed documents, changes to material factors or assumptions underlying the forward-looking information and forward-looking statements and to the validity of the information, in the period the changes occur.

The forward-looking statements and forward-looking information are made as of the date hereof and Aris Mining disclaims any obligation to update any such factors or to publicly announce the result of any revisions to any of the forward-looking statements or forward-looking information contained herein to reflect future results. Accordingly, readers should not place undue reliance on forward-looking statements and information.

Free cash flow, Cash costs (\$ per oz sold), AISC (\$ per oz sold), EBITDA, adjusted EBITDA, adjusted (loss)/earnings and additions to mining interests are non-IFRS financial measures and non-IFRS ratios in this document. These measures do not have any standardized meaning prescribed under IFRS, and therefore may not be comparable to other issuers. For full details on these measures and ratios refer to the Non-IFRS Measures section of the Company’s Management’s Discussion and Analysis for the three months and year ended December 31, 2023, which is incorporated by reference into this presentation and is available on SEDAR+ at www.sedarplus.ca and in the Company’s filings with the SEC at www.sec.gov.

Certain information contained in this presentation includes market and industry data that has been obtained from or is based upon estimates derived from third party sources. Although the data is believed to be reliable, Aris Mining has not independently verified such information and cannot provide any assurance of its accuracy, currency, reliability, or completeness.

This presentation contains information that may constitute future-orientated financial information or financial outlook information (collectively, “FOFI”) about the Company’s prospective financial performance, financial position or cash flows, all of which is subject to the same assumptions, risk factors, limitations and qualifications as set forth above. Readers are cautioned that the assumptions used in the preparation of such information, although considered reasonable at the time of preparation, may prove to be imprecise or inaccurate and, as such, undue reliance should not be placed on FOFI. The Company’s actual results, performance and achievements could differ materially from those expressed in, or implied by, FOFI. The Company has included FOFI in order to provide readers with a more complete perspective on the Company’s future operations and management’s current expectations relating to the Company’s future performance. Readers are cautioned that such information may not be appropriate for other purposes. FOFI contained herein was made as of the date of this presentation. Unless required by applicable laws, the Company does not undertake any obligation to publicly update or revise any FOFI statements, whether as a result of new information, future events or otherwise.

Location of our mines and development projects in Latin America

- Corporate office in Bogotá, capital city of Colombia
- Operations office in Medellín, close to operations
- Benefits of Colombia:
 - Country is rich in high-grade gold deposits
 - Emerging gold industry alongside an active artisanal mining sector, presenting a sizeable collaboration opportunity pursued by Aris Mining
 - Well-developed infrastructure
 - Economic stability
 - Skilled workforce
 - Strategic location within Latin America

● Operating mines, with expansions underway ● Development projects

Segovia – ranks as a leading high-grade mine globally

Operating Mine ^{1,2}	Owner	Reserve Tonnes (kt)	Reserve Grade (Au g/t)	Contained Gold (koz)

Fosterville	Agnico Eagle	12,400	6.1	1,682

Segovia, at 11.6 g/t reserve grade³, is one of the highest-grade gold operations in the world.

Notes:

1. Per data available in S&P Capital Markets as of April 5, 2024.

2. List of high-grade operations is derived from publicly available information and is illustrative and may not be exhaustive or up to date.

3. See Appendix for details of technical disclosures and full disclosure of Mineral Reserve and Mineral Resource estimates.

Segovia – our cash flow engine

- 2024 guidance range of 200,000 to 220,000 oz gold production at AISC/oz of \$1,225 to \$1,325
- 1.7 million ounces gold produced since 2011 at an average grade of 12.2 g/t¹, since 2018 Segovia has produced approximately 200,000 ounces per year.
- Reserve-only mine life extended to nearly 7 years based on 2023 production rates following 2023 interpretation changes and exploration success²
- 2024's \$18.5M exploration program of 93,300 metres to: (1) upgrade high-grade inferred to indicated mineral resources adjacent to our active mine workings, (2) maintain a pipeline of prospective inferred resources, and (3) support our contract partner miners (CMPs)
- 40-45% of production from CMPs, where cost is based on % of the US dollar gold price, ensuring a relatively fixed margin
 - Unique opportunity to unlock and share value, our facilities recover >95% of gold versus <50% recovered by artisanal methods
 - Over 40% of the workforce are formalized CMPs, providing more than 12,000 family members with social security and other benefits
- Polymetallic plant produces concentrates and extracts valuable metals from tailings waste

Notes:

1. See Appendix for details of technical disclosures and full disclosure of Mineral Reserve and Mineral Resource estimates

2. See "Technical Disclosure and Qualified Person" in the Appendix for full disclosure of technical and scientific details.

3. Non-IFRS measure, refer to the MD&As for the period ended December 31, 2023 for a reconciliation of AISC, free cash flow before growth capital and taxes and cash flow after taxes and growth capital for Segovia Operations.

4. Calculated as AISC margin per the MD&A, less working capital movements and foreign exchange movements.

Two operating mines with expansions underway

Segovia Processing Plant Expansion

- Plant expansion by 50% from 2,000 tpd to 3,000 tpd from installation of ball mill and new receiving facility for CMP mined material, expected completion in early 2025
- Expected capex of \$11M for plant expansion
- Potential to gradually increase annual gold production from 200-220 koz to over 300 koz, as new capacity used by (1) increasing our mining rates and (2) providing more processing solutions for CMPs

Marmato Lower Mine Expansion Project¹

- Upper Mine currently producing ~25 koz/year; historic narrow vein mine with small scale, labour intensive mining
- The new Lower Mine will access wider porphyry mineralization and increase total production to 162 koz per year with a 20-year mine life
- Avg \$74M of net cash flow / year before tax once Lower Mine is fully operational^{1,2}
- Lower Mine is a \$280M capex project including building a new 4,000 tpd processing facility; construction is underway and first gold is expected in late 2025
- \$122M of capex funded by committed stream financing³

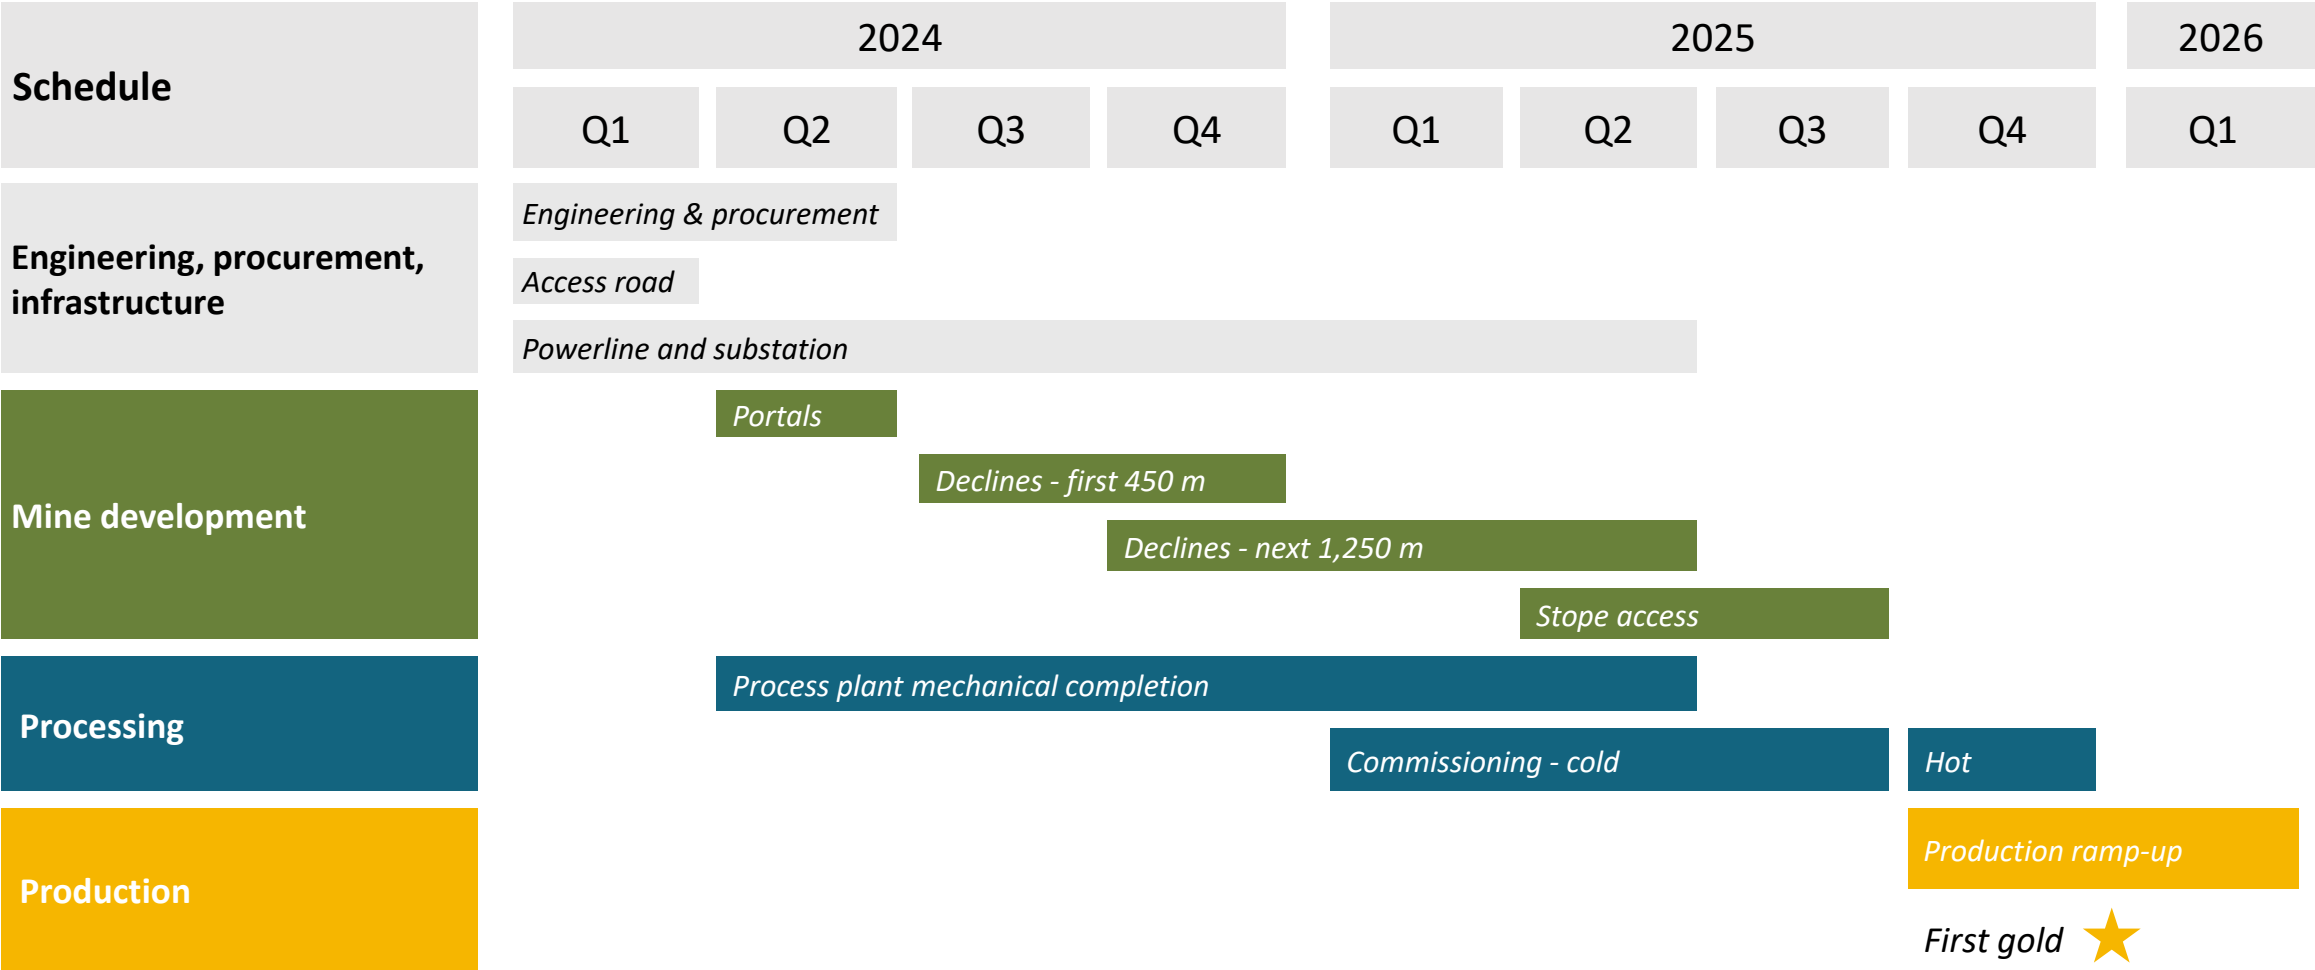

Notes:

1. Refer to the pre-feasibility study (PFS) on the Marmato Lower Mine Project with an effective date of June 30, 2022, see “Technical Disclosure and Qualified Person” in the Appendix for full disclosure of technical and scientific details.

2. Non-IFRS measure. Net cash flow defined as operating margin less sustaining and non-sustaining capex after working capital adjustments, before tax.

3. US\$122M remaining payable in three installments based on project completion: \$40M at 25% complete, \$40M at 50% complete and \$42M at 75% complete.

Two additional large-scale growth projects

Soto Norte Gold-Copper Project

- 20% joint-venture interest (with option to increase to 50% ownership); Aris Mining is operator
- One of the world's largest undeveloped underground gold projects; has faced environmental permitting challenges
- As the first producing mining company to lead the project, Aris Mining is focused on lowering construction and operating risks, and introducing more practical design criteria

Toroparu Gold Project

- Gold exploration and development project in western Guyana
- Currently working to optimize road access routes and other site infrastructure

Notes:

1. Refer to the Soto Norte Technical Report with an effective date of January 1, 2021, see "Technical Disclosure and Qualified Person" in the Appendix for full disclosure of technical and scientific details.

2. See Appendix for full disclosure of Mineral Reserve and Mineral Resource estimates and source information.

3. Soto Norte on a 100% basis.

4. Refer to the Toroparu Technical Report with an effective date of February 10, 2023, see "Technical Disclosure and Qualified Person" in the Appendix for full disclosure of technical and scientific details.

Why invest in Aris Mining?

Experienced team

- Demonstrated ability to enhance operations, increase mineral resources, obtain permits and deliver construction/expansion projects
- Track record of value creation, operational excellence, financial discipline, and good corporate governance

Expanding Quality Gold Assets

- Established high-grade and profitable operations in Colombia's emerging gold industry
- Expansions at Segovia & Marmato support 2026 production target of 500,000 ounces¹
- Additional long-term production growth potential from Soto Norte and Toroparu

Smart Entry Point

- Attractive blend of current production + exploration + growth projects
- Repositioning of Aris Mining within gold producer peer group is underway

Notes:

1. Estimated consolidated 2026 production based on Marmato PFS and increased production following completion of Segovia plant expansion.

Delivering growth responsibly

Aris Mining works with local governments, communities and other stakeholders

Highlighting some of our key ESG initiatives

Communities

- Committed to social spending at both Segovia Operations and Marmato.
- Education as a key development driver: we fund the bilingual La Salada school, educating over 800 students from the Segovia area and impacting a further 2,500 in other programs.

People

- Empowering women in mining through training programs and focused recruitment.
- CMP training programs in health and safety, environmental stewardship, accounting, compliance, and business management.
- Positive union engagement, with collective bargaining agreements in full force and effect
- Vision Zero program to raise employee, contractor and CMP awareness in safety.

Environment

- Segovia Operations ranked as a leading global gold mine, based on low carbon emissions per ounce produced.
- Water use in Segovia Plant is 75% recycled, aiming to improve to 90% by end of 2024.
- An historic TSF at Segovia has been transformed into a community park.
- Electricity at Segovia comes from renewable sources, including hydroelectric.

Ethics & Governance

- Priorities aligned with U.N. Sustainable Development Goals (SDGs).
- Selected six SDGs to track our performance in annual reporting.
- Whistleblower and grievance mechanisms available for all of our stakeholders.

Sustainability Report

To promote our ongoing commitment to transparency and social responsibility Aris Mining publishes a sustainability report available at www.aris-mining.com

Marmato – expanding and modernizing

Marmato is becoming a modern long-life, low-cost, 162 koz/year gold operation¹

- ✓ Historic mine with an established social license in a secure, mining-friendly region of Colombia
- ✓ Opportunity to materially expand and modernize the mine following the discovery of a large porphyry mineralized zone below the existing operation
- ✓ Strong community support with ongoing social investment commitment
- ✓ Pre-feasibility study complete with optimization studies and final engineering in progress
- ✓ Expansion financed through cash balance, operating cash flow and \$122M Wheaton Stream
- ✓ Construction started in Q3 2023

Notes: Mineral resources are not mineral reserves and do not have demonstrated economic viability. Mineral resource estimates are reported inclusive of mineral reserves. Totals may not add due to rounding. Mineral resource estimates for Soto Norte represent the portion of mineral resources attributable to Aris Mining based on its 20% ownership interest. Mineral resources were estimated using a gold price of US\$1,700 per ounce at Marmato, US\$1,300 at Soto Norte, US\$1,850 at the Segovia Operations, US\$1,650 at Toroparu, and US\$1,450 at Juby. The mineral resource effective dates are June 30, 2022 at Marmato, May 29, 2019 at Soto Norte, September 30, 2023 at Segovia, February 10, 2023 at Toroparu, and July 14, 2020 at Juby. This disclosure of mineral resource estimates has been approved by Pamela De Mark, P.Geo, Senior Vice President Geology and Exploration of Aris Mining, who is a Qualified Person as defined by National Instrument 43-101.

Unless otherwise indicated, the scientific disclosure and technical information included in this presentation are based upon information included in the NI 43-101 compliant technical reports entitled:
